

Nexus-Architecture & Mathematics' Newsletter

n.4 - September 2026

Editorial

We are happy to announce that the association and Springer-Nature have signed an agreement which gives our members the privilege of a **reduced subscription to the Nexus Network Journal**: the official journal of the association where Nexus conference papers (and others) are regularly published.

The agreement will start January 2027.

The cost for one year for individual subscription to all four regular issues of the Journal (and any supplements) is 55 euros for the electronic edition, or 160 euros for the print edition.

The cost will be paid by members to the association via bank transfer, and the association will pay Springer-Nature and make sure that all paying members get their access code to the Nexus Journal page on the Springer website.

All members eager to buy a subscription for 2027 have to send a mail – as soon as possible – to the association:

info.nexusassociation@gmail.com

and we will send you a form to fill out.

Springer Nature, the official publisher of the Nexus Network Journal is also promoting a

book series:

“Mathematics and the Built Environment”

which already counts ten published books, five of which are authored by Nexus members, or scholars who belonged to the Nexus “group” before this group became a registered association. The list is available at:

<https://link.springer.com/series/15181>

Regardless of whether books in this series are focused on specific architectural or mathematical themes, the intention is to support detailed and rigorous explorations of the history, theory and design of the mathematical aspects of built environment.

To achieve the highest research standards, each volume in this series undergoes a rigorous peer review process managed directly by the series editors.

The series editors are Kim Williams and Michael Ostwald, both members of the Nexus Association board. The publishing editor at Springer Nature is Frida Trotter.

If you wish to submit a book proposal you may contact directly Kim Williams, Michael Ostwald or Frida Trotter for preliminary guidance, and then you will have to submit a formal proposal to Springer, following the online procedure and filling out the form which is available at:

https://media.springer.com/full/springer-instructions-for-authors-assets/pdf/SN_BPF_EN.pdf

We encourage all members to take advantage of this fruitful established partnership to promote their work and disseminate the results of their scientific research.

Wishing good luck to all of you!

Sylvie Duvernoy - President
